English | Hindi | Marathi

PROJECTS

GoGrocers-Online Grocery shopping website
- The main objective of this Online Project is to enable the customer to purchase their daily groceries and pay for that online.
- Customer can register, search products by name or category and add product to cart.
- And on succesfully placing order doorstep delivery will be provided.
- Admins can add new products & edit details.
- The technologies used in this project are Java, Spring boot at Backend, MySQl for database and HTML,CSS,React for frontend.

Greenhouse Monitoring and Controlling System.

In this project various environmental parameters like Temperature, light, soil moisture, are sensed via sensors and it's output in digital form is given to a Microcontroller (PIC 16F877A-a 40pin IC).If the parameters are not optimum for good crop yield then corresponding Relay will be switched on. Like if light intensity is low bulbs will be switched on. If soil moisture is less then water sprinkle will be turned on. If temperature goes beyond range fan will be turned on.
